Brief Report:

The child grew up under the care of her grandfather and grandmother. She has asthma. Her parents are separated, and her 3 siblings now are living with her father. So now the mother works as housemaid for 5 years earning P4,000 a month. Although the mother works near their house but still she can't give enough time for the child, because she is stay-in and her boss is strict to allow the mother to stay in their home. The grandfather now has half-body stroke for 8 years. The grandmother works in ironing dresses and washing clothes once a week earning P400. In spite of their age, they are willing to do the responsibilities like cleaning and going to church.
