### Brief Report:

Denise is the 8th children of Eslaban couple. She is 4 years old. Her 5 siblings are still studying, her older sister is a working student and her brother working as service crew in shakeys. They rent a small house and pay 1,500 monthlies. They squeezed in a small room just to have shelter to live for them. That's why they cook outside their house and their CR is also the comfort room of their neighbours. The father is only a tricycle driver working 3 days and 4 half days, the maximum amount he earns is 400 if whole day and 200 if half days. What he earns is really not enough to meet their needs. So, the mother now has to find ways to earn and that is sell cosmetic product, lotion and dress. They are honest to tell us that most of the time they are delayed in paying their expenses like the rent, water and electricity. In this case they tend to borrow money from others. So they always experience shortage in terms of finances and other things.
